

## Installing Halliburton LogView Pro V9.5.0

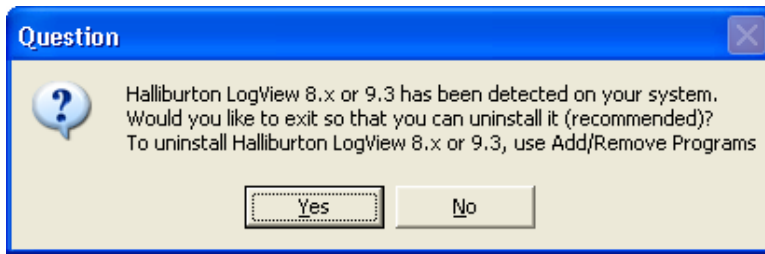

1. From Windows Start-Run dialog, or Windows Explorer, run the installation file provided and click the “Continue” button on the Welcome window.

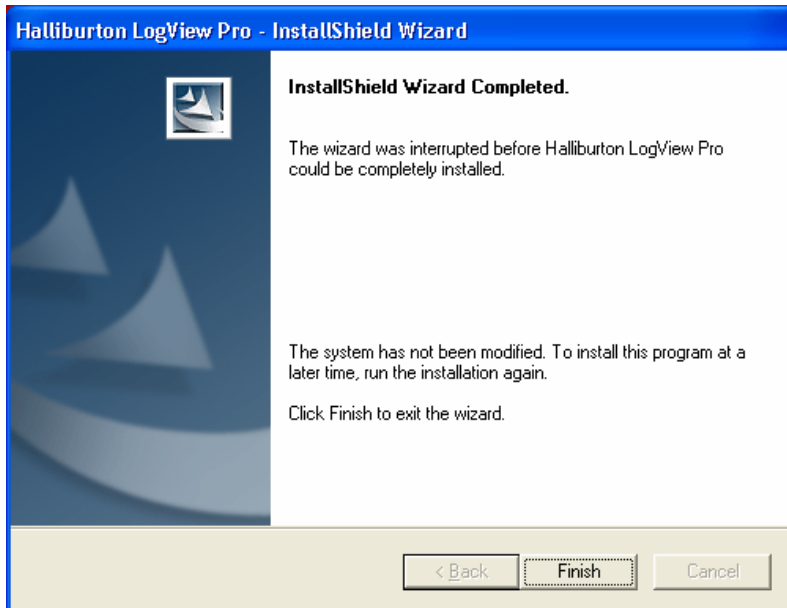

2. Select "I accept..." on the "Software License Agreement" screen and click the “Next>” button to continue.

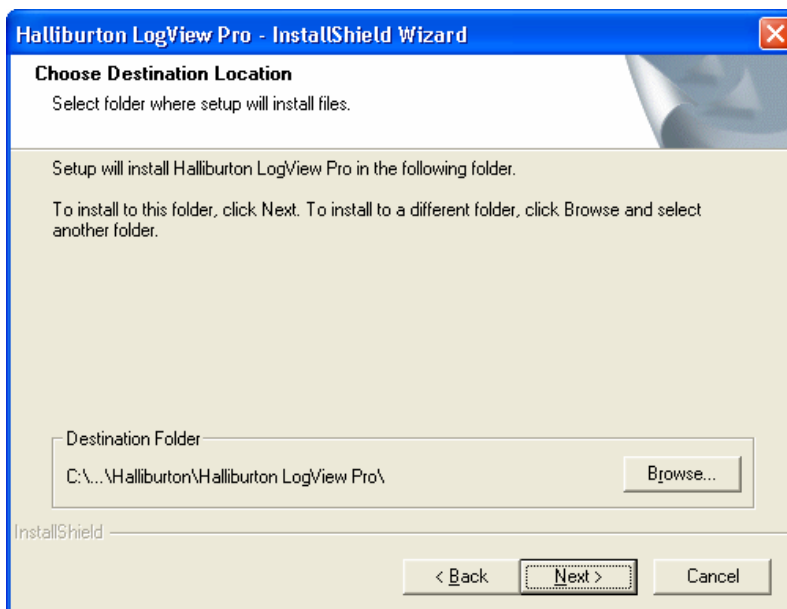

3. If a version of Halliburton Log Viewer prior to version 9.5 is installed, the following screen will appear:

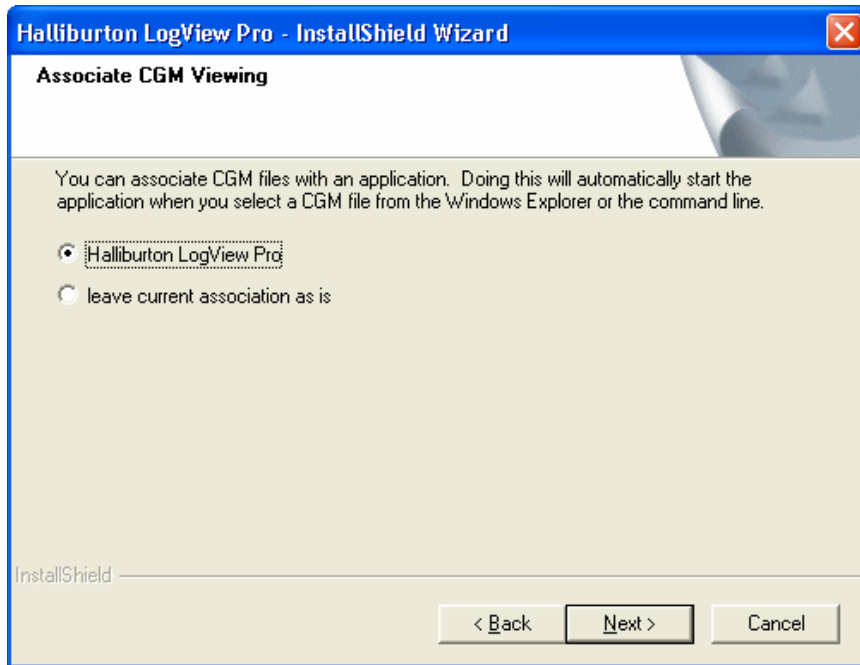

4. If you choose "Yes", the InstallShield Wizard will terminate to allow the user to uninstall the previous viewer. Click on the "Finish" button to continue.

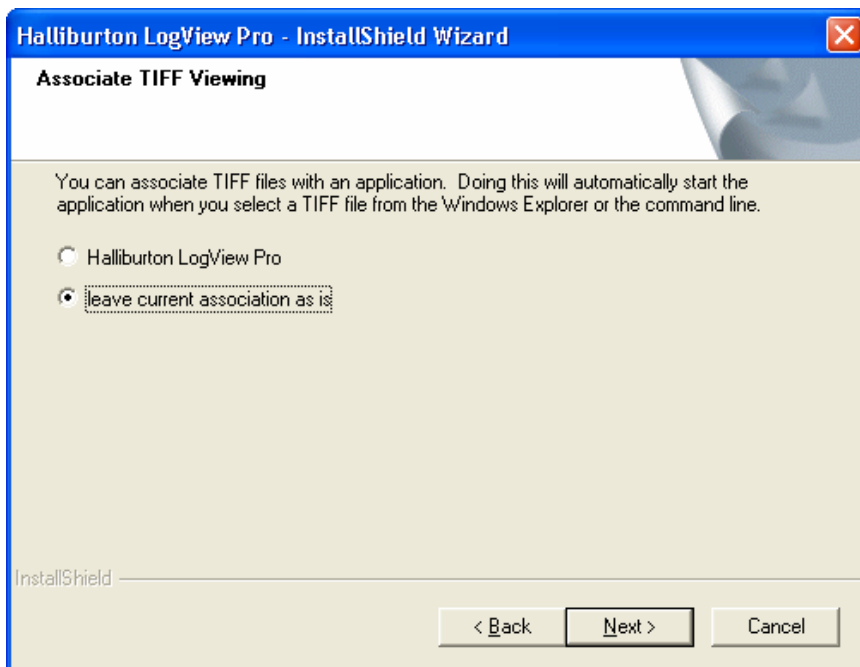

5. If you choose "No" in the "Question" window of step 3 above, the installation will continue. Click "Next>" on the "Choose Destination Folder" screen.

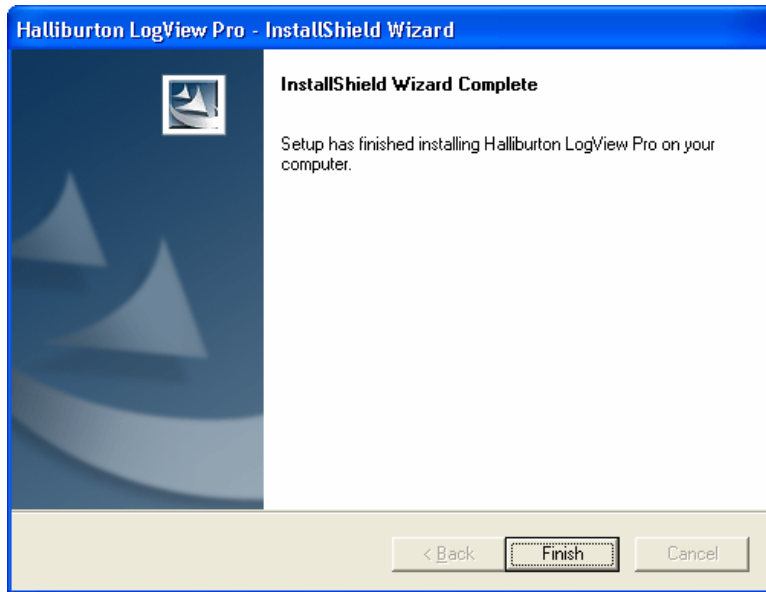

6. If you have set CGM file associations for another application on your system, select “leave current association as is” in the screen below. Otherwise it is recommended to associate CGM files with Halliburton Log Viewer.

7. If you have set TIFF file associations for another application on your system, select “No, leave current TIFF association as is” in the screen below. Otherwise it is recommended to associate TIFF files with Halliburton Log Viewer.

8. Click "Finish" on the "InstallShield Wizard Complete" screen to complete the installation.

The application can now be started from the Start-Programs-Halliburton-Halliburton LogView Pro menu, or the *Halliburton LogView Pro* icon on the Windows Desktop.

The application can also be started by double-clicking a TIFF or CGM file in Windows Explorer if these file types were associated with the application during installation.
